

2021 CT State USBC Association Scholar of the Year Mishka Morris

I am Mishka Morris, and I have a lot of aspirations and interests in life. Some of those interests including bowling, volleyball, researching fun facts (mostly about the human body), playing games, and helping out wherever I can as I like to keep people happy. Moving on to high school, I went to Norwich Technical High School, and I very much enjoyed my time there. I had a big circle of friends and we were all very close. I loved communicating with my teachers and learning new things as much as I could. I applied myself a lot in high school, maintaining A's and B's throughout all four years and ranking 47th in my class. My friends and I always liked to have fun out of school as well, going to small parties, playing video games, watching movies, etc. Now that we've all graduated, some students are moving straight into working full time, some are going into the armed forces, and some, like me, are going to college to further their education. I will be attending Eastern Connecticut State University in the fall of 2021, studying health science as my major, and specializing in neuroscience. I will be attending for four years at Eastern, and afterwards plan to go to med school to get my medical license and become a coroner as a long term career.
